- Problem Solver**
Innovative approach to challenges
- Eagerness to Learn and Grow**
Always Eager to learn new technologies

SKILLS

HTML CSS JavaScript
Next.JS GIT C language
React Native Firebase
Tailwind Type Script

SKILLS EXPERTISE

SUMMARY

I'm Muhammad, a web and application developer currently studying at 42KL. With hands-on experience in Next.js, I am focused on becoming a full stack developer. Driven by a strong desire to continuously learn and adapt, I am committed to mastering a wide range of technologies and delivering innovative solutions.

EXPERIENCE

Web App Developer Internship

Raion Technology

08/2024 - 01/2025

Developing a Seamless CRM on Next.JS, main purpose of the CRM is to connect employees with other companies.

Teacher Assistant

Fugee School

06/2024 - 08/2024

As a Teacher Assistant at Fugee School, I assist in teaching Google Workspace tools for the Google Certificate program. I help develop course materials, support students individually, and enhance their learning experience with practical exercises.

Web Developer Role

Refugee Action For Change

01/2024 - 04-2024

Developed Refugee Action for Change (ReAct) NGO's website utilizing Next.js technology. Focused on user-friendly design and accessibility, ensuring information accessibility for all stakeholders. Created a small CMS panel where admin can make small changes like change image and text etc.

Freelance ASP.NET Developer

Telcan Inc | Remote

05/2023 - 07-2023

Successfully diagnosed and resolved critical bugs in an existing ASP.NET project, enhancing the application's stability and functionality. Collaborated with the client to understand specific SQL Server permission requirements and implemented granular access controls to enhance data security and integrity. Provided clear and concise documentation to facilitate the client's understanding of the implemented SQL permissions, enabling them to manage permissions effectively in the future.

WordPress Website

Remote

12/2021 - 01-2022

It was my first ever project made for a client. I developed a customized real estate website for the client using WordPress as the content management system. Leveraged the RealEstate plugin to enhance property listing functionality, enabling the client to showcase properties efficiently. Implemented responsive web design principles to ensure seamless user experiences across various devices, resulting in improved user engagement.

EDUCATION

Core Programme

42KL Sunway Education Platform

2024 - Present

Bachelor's in Computer Science

Slef-Paced Online Learning

YouTube | Pluralsight
